

# BENEFITS OF AUSTRALIA PLACEMENTS

Invest in yourself, Invest in your future

1

## EASY START

Confirm your place by completing our Registration Form and paying the £200 Acceptance fee.

2

## SAVING TIME AND STRESS

It often takes 60 to 100 applications to secure a placement. We save you the time & stress of multiple applications.

3

## BOOST YOUR CV

Everyone needs an edge to get a good graduate job. International placements make a CV stand out and show you can integrate in a new country and company, not just "go travelling".

4

## GROW YOUR NETWORK

Working abroad will help you expand your work network and could even lead to a job offer. Show initiative, get involved and be productive.

5

## TRACK RECORD

Our colleagues in Sydney will know your host company & supervisor. Most companies have received several interns before you.

6

## GOOD TRAINING

You'll receive training from your host company and experience work in the real world. It's a natural step between university and a full-time graduate job.

7

## ENHANCED SOFT SKILLS

Working abroad requires self-discipline, organisation and good communication skills. This experience will demonstrate that you can adapt to new environments and embrace change.

## 8 SAFETY

Our friendly support before and during the trip gives you a safe way of doing an international placement.

## 9 TAILORED PLACEMENT

Tell us the type of work you want. We'll arrange it. Simple as that!

## 10 FLEXIBILITY

You can agree your start date, duration, working hours and days with the host company.

## 11 BE PART OF A COMMUNITY

Join our monthly group video calls to get updates from our staff, ask your questions and meet others going to Australia.

## 12 PAY IN INSTALLMENTS

Spread out the cost by agreeing a payment plan with us for no extra fee.

## 13 SAVE MONEY

Get a discount by referring a friend and then share the adventure with people you know!

Sarah Box, 23  
Leeds Beckett University

I have become much more confident...I am capable of taking on more and more responsibility
